PROJECTS

FarmSense Pro: IEEE Published Research Project IEEE Xplore

- Co-authored and co-developed an ML platform for crop yield prediction and crop price forecasting using agricultural, environmental, and market data.
- Team compared Linear Regression, Decision Tree, Random Forest, and XGBoost; XGBoost performed best at 94.3% accuracy in the published evaluation.
- Built the complete Streamlit dashboard (single and batch CSV prediction, price forecasting, market insights, model information) using AI-assisted development with Google Antigravity.

AI Resume Analyzer & Career Assistant GitHub

- Built an AI-powered resume analysis app using Python, FastAPI, LangChain, Groq API, and ChromaDB.
- Implemented PDF/DOCX resume parsing, LLM-based skill extraction, role matching with scores for the top three roles, and skill-gap analysis.
- Developed a RAG-based career assistant that generates role-specific roadmaps and answers career questions.

DocVault (Document Organizer) Live demo | GitHub

- Developed and deployed a document management app using React, TypeScript, Vite, and Supabase.
- Implemented authentication, document storage, camera and file upload, OCR text extraction with Tesseract.js, and search by extracted text.
- Applied PostgreSQL Row Level Security so each user can access only their own documents.

PUBLICATION & PRESENTATION

- "FarmSense Pro: A Data-Driven Approach to Crop Yield and Price Estimation," IEEE Xplore, 2026. Presented at ICSSCNA-2026 (International Conference on Signal, Systems, and Computing for Next-Gen Automation), Ramachandra College of Engineering, Eluru, 4 to 6 May 2026.
